

It is my opinion that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy Law. I believe that I have the right to restrict which parties can use a service that I pay for, just as I can go to the Post Office and select NOT to receive junk mail. I find telemarketers rude and offensive. I believe that they are invading my privacy by generating unwanted telephone calls. I also believe that they take advantage of the elderly and the current Indiana Telephone Privacy Act allows us to restrict this unethical practice.
